

ENERGY POLICY

The company recognises their responsibility as a large manufacturing company whose products are enjoyed worldwide and believe that every effort should be made to conserve energy and our natural resources. We also believe that this commitment will be beneficial to our employees, investors and surrounding neighbours in prudent financial management and the saving of energy.

The fulfilment of this policy is the joint responsibility of the Directors Team, Departmental Managers, support staff as well as all employees. Cooperation shall be essential on all levels in order for this policy to be successful.

Senior Management will continue to research new environmental friendly technologies and invest in them to create a brighter future for its employees and surrounding environment.

The company will maintain accurate records of energy consumption and cost of energy ongoing throughout each year. The company will endeavour to maintain its obligations in order to meet the requirements of the CCA (climate change agreement)
